```
-- --- ARITHMETIC OPERATOR ---

+ -- addition
- -- subtraction
* -- multiplication
/ -- division
% -- modulo

-- --- COMPARISON OPERATOR ---

== -- complete equality check for type and value
/= -- complete inequality check for type and value
< -- comparison operator
> -- comparison operator
<= -- comparison operator
>= -- comparison operator

-- --- LOGICAL OPERATOR ---

&& -- and
|| -- or
not -- not
```

Control Structures

```
-- ----- CONTROL STRUCTURE -----

-- --- CONDITIONALS ---

-- IF ELSE IF ELSE
    -- operates the same as in other programming languages

isAdult : Int -> String
isAdult age =
    if age >= 18 then
        "Adult"
```
